

	SY, Female (Mar-Jul)	SY, Female <u>or</u> Male	SY, Male (Mar-Jul)
Wg	58-61	62-64	65-68
Crown	Dull green with little or no gray coloration		Primarily gray, often tinged green
Eye line and supercilium	Indistinct and dusky olive with a light yellow wash		Moderately distinct, dusky, and whitish
Underparts	With a moderate yellow wash		Lightly washed yellow
R5, r6	Lacking white or whitish spots	White or whitish spots	

Notes:

1. Easiest to age birds before sexing.
2. All age/sex criteria should be combined for reliable determinations.
3. Some intermediates will not be reliably aged and/or sexed.
